## Summary

# "Simplicity is about subtracting the obvious and adding the meaningful." #

Hey there! This is Tarun Bisht, a computer science engineering student in CU, Punjab. I have some experience in market analysis with software development and making projects which are fully based on AI and ML. I basically aim to innovate new things with some interesting content.
As a undergrad engineer I am trying to learn skills with respect to my field. And what I might lack in skills I make up for with my determination to learn.

In the next few decades, India will rise in technology advancement of quantum computing so as a beginner I want to see my future in quantum physics which gives a different look to our society and even change the lifestyles of the people.

Outside of tech, I am a cricketer, a singer and love to spent my spare time in watching movies.

_____

## Experience

### GirlScript Summer of Code
Participant
February 2021 - Present (2 months)
Chandigarh, India

-GirlScript Summer of Code is the 3 month long Open Source program during summers conducted by GirlScript Foundation, started in 2018.
